

General Instructions for the Examinations

- The time available for solving the problems on each day is 5 hours.
- In case of problems raise the appropriate colored sign (HELP, BATHROOM, PAPER, WATER/SNACK) and wait for a staff member to help you.
- Use only the pen, pencil, ruler, and papers (blank and graph) provided. Additionally, you may use a calculator.
- Please provide clear reasoning for all steps in your solutions. In particular, all intermediate calculations should be given, and only those mathematical steps dropped, which can be done in mind.
- Please write as little text as possible. Express yourself in equations, numbers, figures, and plots, whenever possible. Where textual explanations are necessary, you are encouraged to use English even if you are not sure about the grammar. You can also provide explanations parallel in English and your native language. This helps the markers, and in the case of misunderstandings, the text in your native language serves as a reference.
- Partial credit can be obtained even if you cannot completely solve a problem, but understand some of the steps which need to be done, and have documented it clearly in your paper.
- Indicate in the boxes at the top of each page your student code, the part of the problem you are solving, the successive number of the page.
- When the time for writing is over, write the total number of pages for each problem in the boxes at the top of each page. Arrange the sheets that you want graded for each problem, ordered by the page number. Put the cover sheet on top of the sheets. Place the sheets on the table and wait for the staff members to collect your paper.
- You may leave the hall only after the papers of all students are collected and staff members tell you so.
- You are not allowed to take anything out of the hall except your calculator.
